

## Create Node-RED Service

1.To create a web application create a Node-RED service. Steps:

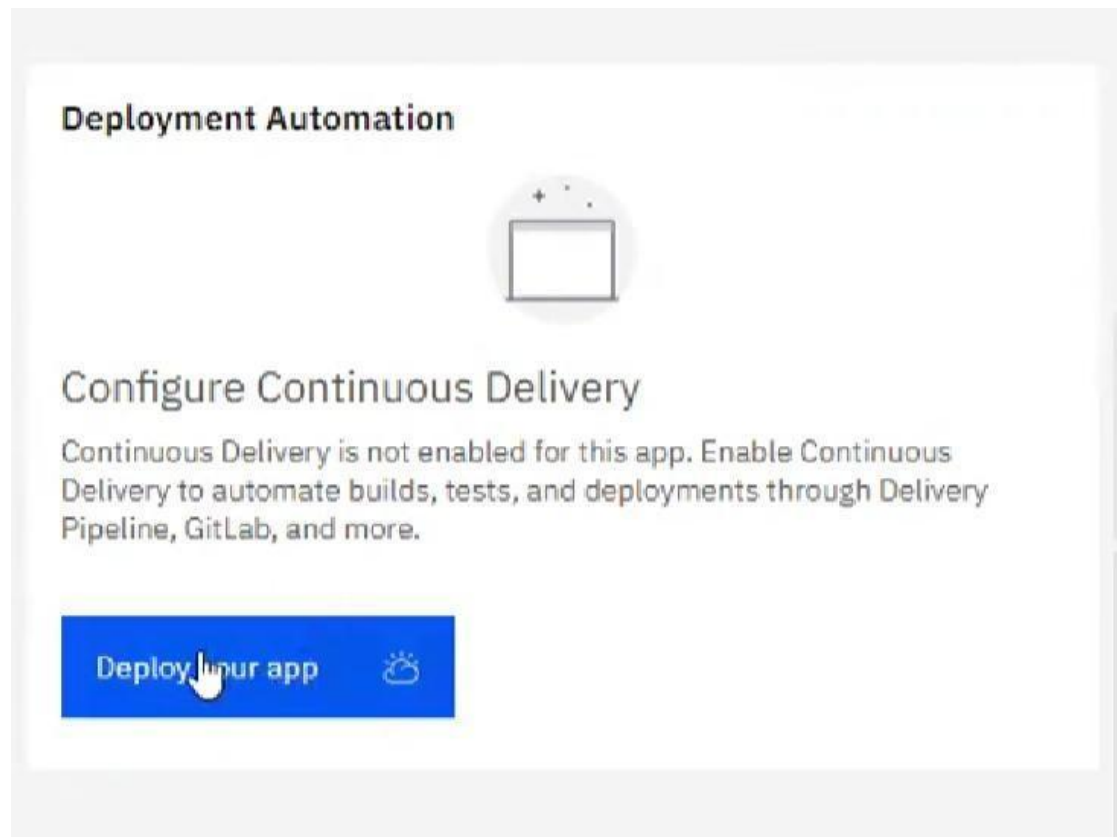

1. Navigated to the App creation page

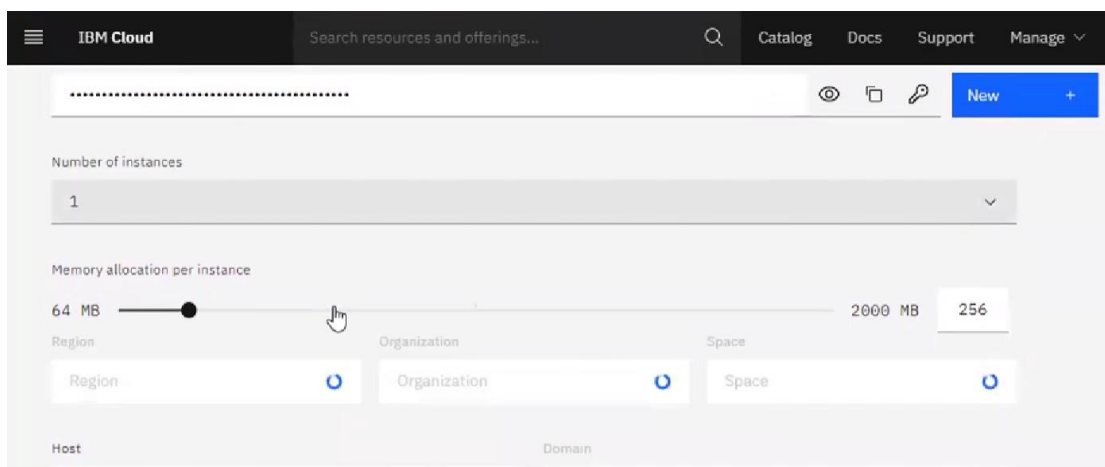

2. Enter project details and click on create

3. Click on the “Deploy your App” Button

#### 4. Set up the environment and deploy the app

### Delivery Pipelines

Name	<a href="#">ci-pipeline</a>
Status	<span>✓</span> <a href="#">Success</a>
Last input	Last commit by IBM Cloud DevOps Services (7 minutes ago) <a href="#">Clone from zip</a>

## 5. Instance editor and set up credentials

### Welcome to your new Node-RED instance on IBM Cloud

We know you're eager to start wiring up your flows, but first there are a couple of tasks you should do:

- Secure your Node-RED editor
- Learn how to install additional nodes

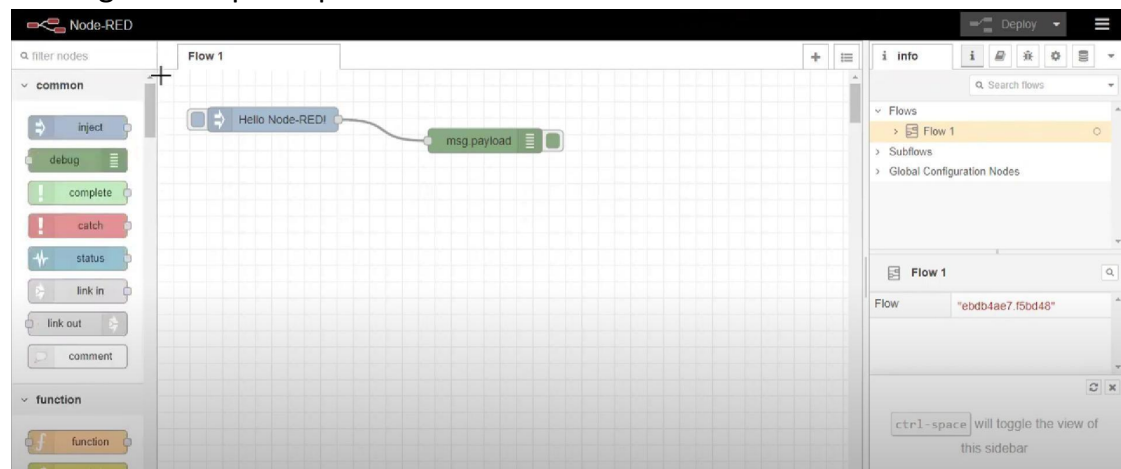

☐ Secure your editor so only authorised users can access it

☒ *Not recommended:* Allow anyone to access the editor and make changes

Your editor will not be secured. Anyone with the URL will be able to access your flows, data and bound services.

☒ Tick this box to confirm you want your editor to be insecure

## 6. Drag and drop components into the editor

## 7. deployed the app

## CONCLUSION:

Created a NodeRED service on IBM Cloud Successfully
